

Digital Automation Engineer

Are you looking for a role where you can make an impact on processes, automation, and innovation? Do you enjoy collaborating with IT, Supply Chain, and key users to develop smart solutions that truly move the organization forward? And do you get energized by optimizing, standardizing, and continuously improving automation solutions?

Then join Limburg's Most Attractive Employer as a Digital Automation Engineer.

As a Digital Automation Engineer, you are responsible for ensuring the correct functioning and effective use of automation solutions within KLG's business processes. You work closely with the IT department, Supply Chain, and key users to provide optimal process support through technology. In addition, you provide second- and third-line support and actively contribute to the further digitalization and innovation of our organization, with a particular focus on AI-driven automation solutions. You will be part of the IT department, report to the Team Leader Business Applications, and also participate in KLG's AI project group.

What will you do?

- Manage, optimize, and monitor automations and applications within KLG's business processes;
- Develop and implement process-oriented digital solutions in collaboration with IT, Supply Chain, key users, and vendors;
- Provide second- and third-line support and ensure sustainable solutions and knowledge sharing;
- Promote standardization and the correct and secure use of automations, applications, and data;
- Prepare reports, documentation, and information services;
- Identify opportunities, innovations (including AI), risks, and coordinate automation and improvement projects.

What does KLG Europe offer?

- A professional and committed team working together on future-proof solutions;
- Employment with a growing and financially healthy logistics service provider with a strong family-oriented culture;
- 26 vacation days based on full-time employment, supplemented by additional loyalty days for every five years of service;
- A flat organization with short communication lines and plenty of room for personal initiative;
- Extensive opportunities for training, development, and career growth through the KLG Academy, personal development plans, and targeted training programs;
- Regular social activities and events organized by KLG and the employee association, such as the Summer BBQ, Venloop, staff parties, Christmas events, and sporting activities.

Your Profile

- Bachelor's degree level of working and thinking (HBO), preferably in IT, Business IT & Management, Artificial Intelligence, or a related field;
- Experience with automation solutions, applications, and process-oriented work;
- Affinity with digitalization, data, and innovative AI-related solutions;
- Strong analytical and problem-solving skills;
- Accurate, results-oriented, and aware of IT and data-related risks;
- Strong communication skills, customer-focused mindset, and the confidence to act decisively;
- Flexible, entrepreneurial, and comfortable working with multiple disciplines and stakeholders;
- Good command of both Dutch and English, spoken and written.

About KLG Europe

KLG Europe is a global logistics service provider that successfully combines the strengths of a multinational organization with the culture of a family-owned business. Our people are our most important asset. They form the foundation of our company and our success. KLG Europe stands for Borderless Logistics, offering employees unlimited opportunities while also providing a stable and supportive professional home. We actively invest in the growth and development of our employees.
